

A World Class Floor

Over 1400m² of Junckers' premium sports floors have been specified for the prestigious National Centre for Sports in Wales. Registered as an official Olympic Training Camp for the 2012 games, the National Centre has to accommodate a variety of international level sports.

In consultation with several governing bodies of sport, the centre chose a high performance fully sprung SylvaSport floor from Junckers laid on New Era battens, installed by Moran & Sons Flooring Ltd. Operations Manager Nick Lia said: 'With several of their floors in the centre already, Junckers was the obvious choice for our main showcase venue, the Main Hall, due to the quality of their product.' Considered 'builder-friendly' and economical, Junckers' flooring systems can be found in world class facilities all over the world.
